PlantBill

A complete solution for plant
billing

- ✓ Everything at finger tip
- ✓ Tracks Profits and Loss
- ✓ Daily detailed Report
- ✓ No computer Needed

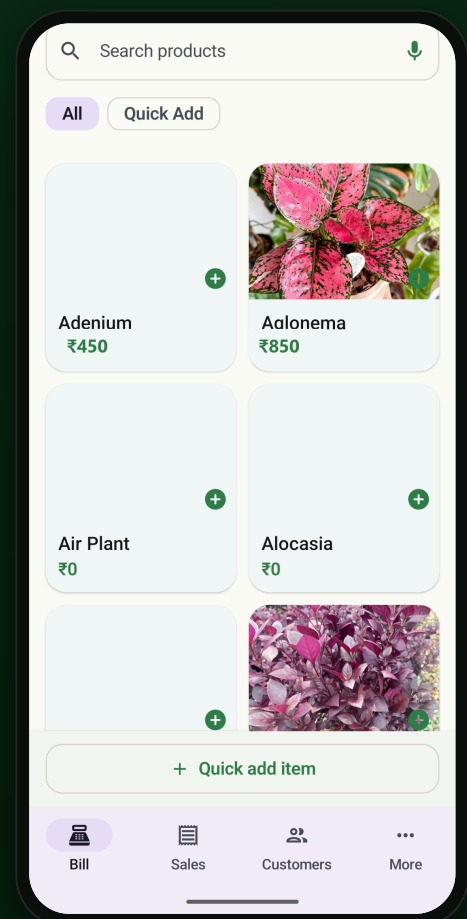

Everything the counter needs — **nothing it doesn't.**

Just 3 Steps

A billing app built for plant nurseries in India. Big buttons, clear numbers, and no clutter — so anyone at the counter can make a bill in seconds, even on a busy morning. Your sales, your cash, and your customers, all in one calm place.

- 1 Add a Plant
- 2 Set the Price and Payment method
- 3 Take the Payment

Built the way good tools should feel — nothing hidden, nothing silent. Every action shows a clear "saved", sends a plain-language message instead of a raw error code, and because many shop owners aren't young, the whole app is drawn large, high-contrast, and forgiving.

The Heart — Creating Bills

The billing screen is the heart of PlantBill — fast for the shop, exact for the money. Add a plant, set its price, take payment. Done.

Add a Plant

Tap any plant with a photo. Big +/– buttons set the quantity.

Price it your way

Prices fill in automatically, but every line stays editable — the same plant sells at different prices by size.

Cash, UPI or split

Show a UPI QR at the counter; the app fills in the remaining amount for you.

Take part-payment

Customer pays some now and owes the rest — saved cleanly as a due.

No double bills

A quick double-tap can never charge twice — every checkout is protected.

UPI QR Payment

The whole shop, in your pocket.

Past the counter, PlantBill keeps the rest of the shop in order — dues, daily cash book, staff, and a report for any day. The numbers you check at night, all in one place.

Money you're owed

A clear khata of who owes what; collect the full amount or part of it.

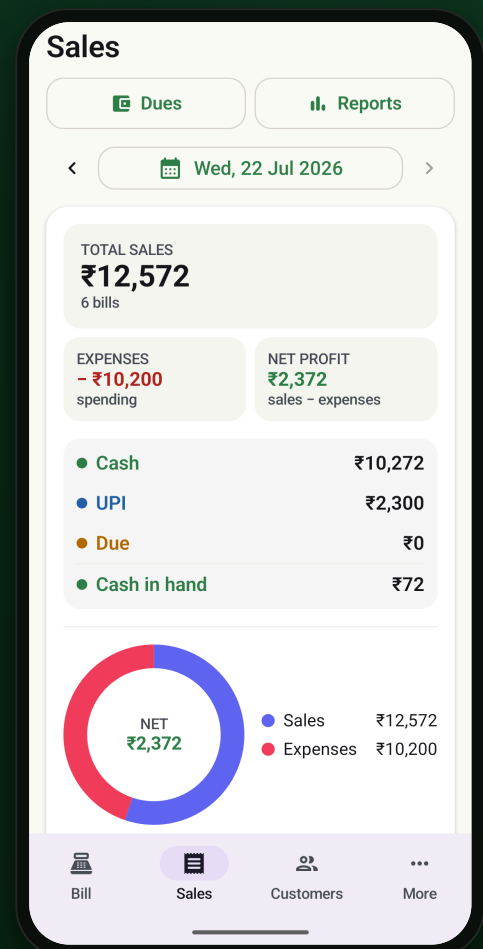

Daily cash book

Opening balance, cash sales, expenses and a live "cash in hand" figure.

Reports & staff

Download any day, week or month as Excel — and see who sold the most.
